

## **a c c u t r a c<sup>®</sup> - n o t h i n g b u t s h i n e**

Remember when you were a little kid and going to the car wash was a little scary? Your mom or dad would drive the car slowly into what looked like a dark, wet cave. It's no wonder people had concerns about automatic car washes. What was their car going to look like when it came out the other side?

The Accutrac<sup>®</sup> Car Wash System has changed all that. Its touch free technology delivers what customers want most — worry free washing. The clean, open bay is nothing like the old, dark cave. And on top of that, customers will enjoy an incredibly clean, shiny vehicle!

Whether your customer drives a compact car, truck or conversion van, our patented system insures a thorough wash by actually adjusting to the size and contour of each vehicle — Clean cars mean satisfied customers. Satisfied customers mean more business and a greater return on **your** investment.

The ACCUTRAC<sup>®</sup> Wash System technologies are so revolutionary they have been awarded four United States Patents. These patented technologies provide many benefits, one of which is greater efficiency. Greater efficiency means the Accutrac<sup>®</sup> Wash System cleans cars faster and uses less detergent, water and energy. Greater efficiency means lower operating costs and more profit for the investor.

Worry free car washing for your customers, more profit for you.

It's what customers want, it's what you need.
